Respondents	Responses
1	It's too far for my child to walk to school
2	i have to ride the bus for an hour to get to school everyday and it would be more beneficial to go to maple ridge secondary or even garibaldi secondary
3	walking distance
4	Location and use of busing seems to be a bit extreme. Having to travel from the west side to the far east side seems costly?
5	Our catchment school is farther from our house (Windebank) than the school my children attend (Central).
6	There is no transportation for my daughters catchment if she gets into Heritage middle. And there certainly is no bus that goes to Silverdale from where I live by West Heights.
7	none
8	N/a
9	My hope is that stave falls will get more organized and eventually phase out 3 way splits. It sounds like the classroom environment is chaotic and a friend regrets sending her child there. We just want an optimal learning environment for our kids. The attitude "that we have 13 years to get them to grad" doesn't fly. Have had several do nothing years with our kids with very low educational standards.
10	Lack of funding, would like to see more focus on fundamentals like reading/writing/math. Very happy with the new principal. Would like to see teachers have a performance evaluation annually to ensure the children are being taught the best they can be.
11	Unsure
12	Everything is good.
13	It is too big for the amount of children going there with insufficient parking
14	Some students are not being allowed in because they attend Hillside or ESR and they live in our catchment.
15	Everything is good
16	I prefer my child to go to the smaller school for personal reasons and that's where she's comfortable. I don't like how the catchment school is on a busy road
17	Our son attends school out of catchment; however, we currently pay \$400 each school year and I strongly feel it should be free - we have a large family and we budget tightly financially - perhaps many other families can't afford transportation for their child(ren) to this wonderful outdoor school and it prevents a higher enrollment there
18	Catchment is working fine; just would like a bus within 2km of school for my son - Stave Lake Road is too busy
19	The walk to the catchment school is along a busy road (Best) and requires crossing a busy intersection (Cedar and Best) cars don't always stop for me when I'm crossing and I'm an adult. There is only a sidewalk on one side of the street.
20	As a grade 12 student, I have to attend Mission Secondary. Mission Secondary, as everyone knows, is not built to maintain the 1300 students it currently has; combined with class composition rules, this is only going to snowball (in my opinion) into a larger issue. The classes of collective Grade 10, 11, and 12 students are only going to get bigger and bigger, and Mission Secondary is going to get busier and busier. A solution must be found to this ongoing problem before this becomes a large-scale issue.
21	the school is too full

## Boundary Catchment Review SD 75 (Mission)

**What is currently working or not working for your catchment?**

22	We attend a school of choice. The catchment school for us does not have a good support system for the students and many are left bullied with no support.
23	No district transportation to/from school
24	My son attends MSS but has to take public transit to school as we are one street away from the area in which he can take school bus
25	I do not know
26	I don't like how far away the school is seeing how we can see a previously closed school from our house. That being said my kids are quite comfortable at the school they are at and wouldn't want to uproot them from it now
27	I live on 11th and Horne. Windebank is close by and within walking distance. But the school rating is lower than the choice schools. I really want to give my daughter the best start possible. My husband and I were both very artsy. And I want my daughter to love school. I grew up going to cherry hill and had a hard time fitting in. ESR also has a lot more playground equipment to explore. And the school grounds are overall more exciting with the different sports set ups and gardens.
28	We were always within our catchment, and close to school, so we had no issues until we went to Middle School. We fall on the bus boundary, and the Middle schools are quite some distance to walk. High school is within walking distance, no complaints there.
29	The staff
30	We are happy with our catchment school
31	We don't have access to French Immersion at our nearest catchment school. My kids have been doing French for 6 and 4 years when we moved here, and I didn't want them to lose that by moving them to our nearest school.
32	School is far away but having the bus is helping
33	More school buses
34	School Buses
35	No bus to get to French immersion
36	Parking situation is horrible
37	We lived close to Hillside. We stayed there when it became traditional because it was close to our house. We moved closer to Hatzic Middle school. Because of our school of choice we now have to pay to take a bus to a school that's closer to us. We would need to take a bus anyway. Catchment schools should not be forced to go to a middle school that's farther from home.
38	We did not qualify for the MSS Bus which was difficult to work around as my child has been bullied by students in her grade and walking doesn't provide the safety she feels she needs. West Heights seems to be okay.
39	Has strong start.
40	It is working for me as of now
41	Not enough high schools
42	N/A
43	We are two blocks from ESR & Hillside, our catchment school (windebank) is probably a 30min walk away. Thankfully we got into ESR and it's less than a 10min walk.
44	Over enrolment
45	Not sure
46	We live close to Heritage within walking distance the catchment is Hatzic Middle School does not make sense to me
47	Bullying was a huge issue for this very large elementary school at the time I was looking for a school for my child. I was made aware of certain issues with this school, hence why we are cross boundary

## Boundary Catchment Review SD 75 (Mission)

**What is currently working or not working for your catchment?**

48	I wish middle school was based on where you live and not what elementary school you attended.
49	Learning and support resources
50	If my children had to attend their catchment school it would be too far to walk, so I would expect that school busses would be provided as there is no way I would be allowing them to use public transit.
51	We have a school bus to get our child to school. However, we have a school that is closer which was, unfortunately, closed (Durieu Elementary).
52	Over capacity. Too many students in a school
53	My son goes to Heritage Middle School and will be at Ecole Mission Senior Secondary next year. I find it very concerning they are operating over capacity and complaints from students and parents have been they have trouble accessing different courses of choice as a result. We need a bigger high school or a second high school.
54	Distance... Both middle schools are on the opposite side of mission. We don't qualify for bussing as we are too close. A 45 min walk or 58 minute transit rude to school if I don't drive the 10 minutes (which makes me late for work every day)
55	Lack of safe walking routes to school. Many streets have low visibility and no sidewalks. So even though the walking distance is reasonable, it may not be safe for pedestrians.
56	Proximity of the school to my home as my children currently walk to school
57	My kids are now in middle and high school so elementary catchment matters little to US, personally, but I know parents who choose schools because of the unique curriculum that fits their child. If you limit those to catchment it doesn't make sense any longer. If the school is desirable then you create a have and have not situation based on where the family lives. As well, many parents are renters and may have to move. If the child does not have to change schools that can be a huge impact on their well being (assuming the parent can keep them in that school).
58	We are very central and our catchment is working for us but if we were going to the English catchment school my child would have to cross Cedar to walk to school.
59	It's so close.
60	School is very full due to both choice schools being so close
61	We don't attend a catchment school so I can't answer for my catchment
62	This question is very vague, is this relating to boundaries and transportation or other issues?
63	I live three blocks from middle school and █ houses from elementary school. My children walk to school
64	Too many cross boundaries
65	The bullying is outrageous at our catchment
66	The music program works for us. We would leave the district all together if the school option was not available.
67	Not sure
68	that i can not go to heritage middle from hatzic
69	Children were cross boundary for their entire elementary school years. When it came to middle school they fell outside of Heritage's catchment. This was a difficult transition as all their friends went to Heritage.
70	Crossing Cedar Valley Connector. It is very dangerous, why no crossing guards?
71	Size, Area, Not School of Our Choice

## Boundary Catchment Review SD 75 (Mission)

**What is currently working or not working for your catchment?**

72	I used to live in the catchment area for ESR, so that is where my children went to school. We then moved, I was not changing their school, as that is not in the best interest for the children. Now when it comes to middle school, even tho we live in the catchment area for HPMS and a bus that picks up kids right outside my house . We have no choice but to go to Hatzic, Or crossB and pay the bus fees. Ridiculous. The school got changed to a CHOICE school long after we were attending. We should not have to cross B our kids to go to middle schools in our catchment area, Regardless of elementary school. It should be based solely on where you live.
73	Classroom size.
74	travel to school. distance away
75	My sons time with designated EA support and communication with the teachers and EA's is not working even with an IEP in place. I am looking for other options for schooling my son.
76	it's fine
77	Poor schools.
78	It is working just fine
79	Too many kids in classes
80	Close to home
81	Seems to be ok
82	Sign up for school of choice early, use school bus services provided for free (and expect it to remain free)
83	Sign up for school of choice early, use school bus services provided for free (and expect it to remain free)
84	Sign up for school of choice early, use school bus services provided for free (and expect it to remain free)
85	It's good all works
86	I feel we're over capacitated
87	We do not attend our catchment school for many reasons.
88	School buses are working but not any portables
89	We attend a school of choice and love it. I think it is in a great central location which also has a catchment school within walking distance for families in the area that don't want to attend the choice school
90	There is no longer a high school in Hatzic
91	Over capacity
92	I wish my children had access to free busing
93	N/s
94	The whole catchment for hatzic middle makes no sense
95	My Situation works for both kids
96	Not sure
97	Bus route is working
98	Not fond of the area that it's in.
99	We are in catchment
100	Portables
101	I wish Hatzic Middle went to grade 12
102	I don't like being in the catch enemy of a choice school
103	Late morning bus every morning so parents are driving children to school!
104	Class sizes are too big
105	Nil

## Boundary Catchment Review SD 75 (Mission)

**What is currently working or not working for your catchment?**

106	There is not enough high schools in my catchment
107	We considered the catchment when we bought our home, as many families do. If you change the catchment boundaries, some families who bought million dollar homes may find that their children now have to be cross-boundary to attend the school of their choosing.
108	I don't like that they have to go over to mission secondary when Hatzic was a high school for so many years
109	Not being in catchment for the school of our choice is frustrating
110	Everything is fine for us
111	my daughter likes the programming offered at her school and does not want to change schools
112	My daughter is attending the school she would like to attend with the program that she wants. we do not want that to change.
113	Seems to be working for us
114	Workjng
115	My home is located too far from my catchment school
116	All our 4 kids have gone to ESR starting before Arts Based curriculum. We would like our kids to remain in the schools that they are currently in with the friends that they currently have. Two more years remaining at ESR.
117	1 home is 5km north west of our "catchment school" and their other home is 6.6km south west catchment. Current school is between the two.
118	The outdoor program and amazing staff at dewdney elementary school works amazing for my son. The down fall is that even though it is quicker to get to the school on bus from Sylvester Rd then it is to hatzic elementary school there is no bus provided for him. I feel like families up Sylvester Rd and miracle valley area could have the option to access either dewdney elementary school or hatzic elementary school with a bus routes provided. My son has been cross boundary for several years and this school ( dewdney elementary) works for him in so many ways and that's why we choose cross boundary. I would like to see a bus provided for families out here to dewdney elementary
119	Lack of consistent sport programs for all grade levels.
120	It works well. Although we live far there is bussing available yet we drive him. We like the catchment is based on where they go to elementary school so kids stay together. Don't change the way you've done the middle school catchments!!!!!!
121	Stave Falls needs the full support of the board. A great job is being done by staff out there with what I consider to be inadequate support from the board.
122	Too far from our house
123	Our catchment is very large and needs to be updated/changed, so new students (to our community) can also access schools such as cherry hill or stave falls etc, which maybe closer to some students and also cut down on school buses.  There is also a lot of new construction/new homes being developed in our schools catchment, this is also leading to over crowding.
124	The distance is quite far the bus helps but it is basically out of reach if he needs to walk
125	the parking lot and the school zone areas
126	the distance my son has to walk to the only high school option in the district
127	I dislike the distance from my house to the school but prefer that middle school to heritage
128	Catchment too far for kids to walk alone but non catchment school super close
129	Works for my children
130	drive time/distance

## Boundary Catchment Review SD 75 (Mission)

## What is currently working or not working for your catchment?

131	None
132	My catchment works really well as my daughter in middle school can walk my younger son to school before catching her bus to school. I really wish there was crossing guards at either cherry and cedar or egglesstone and cedar.
133	Even in my catchment my kids had to go to windebank... both schools in my area were full...
134	My kids are bus students to MSS and HMS. Changes won't effect this as we live rurally. Our youngest attends French immersion so changes will not impact us.  Over crowing at the high school is very concerning. Too many students, not enough space, parking issues. Concerned about decline in learning environment because of this. Hard to attract more teachers with these conditions.
135	Portables.
136	Some walking distances are too far for MSS when they don't have bus routes available for students. Need more bus options to MSS.
137	It is an hour round trip to go to my child's school from my home. Although she does take the school bus more than half the time, there are times when I must drive her pick her up (extracurricular activities, etc) and both the amount of time it takes to get to Hatzic Middle and the amount of gas I pay for is, to me, unreasonable. Otherwise, good school.
138	besides people disregarding the posted speed limit of 50km on the highway that my children walk on to get to school, there is nothing to add
139	N/A
140	Everything is great
141	My children have not been happy in their catchment. One child went cross boundry while in elementary the other will if there is space be switching
142	Na
143	No bus route where i live
144	Lack of bus options for transport to high school. Need more access to bus the current expectation of how far kids have to walk seems unreasonable before they qualify for a bus. I would also pay as an option but am told the buses are too full so cant
145	Overcrowding, boundaries need re-configuration. I live Dewdney and Richards area. Aside from Albert McMahan, there is no other school close. I would rather go to Stave Falls than Albert McMahan if transport was available.
146	My kids go to their catchment school as all should. If you let students cross boundary all the time well isn't every school a choice school ?
147	Concerned about travel distance for children attending middle school
148	Our catchment is over subscribed.
149	Distance from my house to the school my son has to attend because it is a "feeder" school. School of choice goes by school not catchment. Do not agree with this at all.
150	To far, and doesn't qualify for the bus. I do NOT believe a 12/13 should be walking almost 4km each way to school. Especially in winter when it is still dark morning and night. We are on the bus boundary so all my child's friends get the bus leaving him with no one to walk with.
151	The walkway to get to the school is gravel and hard when with strollers, scooters and bikes.
152	I am completely satisfied with the school my son attends
153	No option for school bus, although we see a school bus pass our house. We are told we live to close. Even with paying for my child to use it we were still told no they can walk, hopefully nothing happens to these kids that no option as the school bus drives past them.

## Boundary Catchment Review SD 75 (Mission)

**What is currently working or not working for your catchment?**

154	My child will be attending Hatzic next school year, which I feel is WAY too far to walk, and inconvenient to get to by transit from our house.
155	We love the closeness of the school we are currently but are concerned about lack of sidewalks to make it safe to walk to school and having to cross a busy street to get to a sidewalk. We are also looking to purchase in another area of mission and am very concerned that my children won't be able to walk to school anymore. That is a huge factor in our decision to move at this time with 3 kids.
156	None
157	Middle school should be Heritage not Hatzic
158	Not applicable
159	I haven't been in this district long (less than a year) but it seems that Hillside isn't close enough to other schools to provide local children access to regular stream. ESR is at least close enough to Albert McMahon to reduce access problems.
160	Walking distance to Cherry Hill. Like the community spirit in the school.
161	n/a
162	that theres only 1 [REDACTED] high school
163	There is no side road or trail from my house to school to walk. Would have to walk down Dewdney Trunk Road which is basically a highway
164	deroche doesn't have before and after care which in my future might be needed
165	Our catchment school currently does not have portables, which is fantastic
166	Not school of choice
167	We are in the boundary but our childcare is closer to our school of choice. Childcare is not easy to find or switch.
168	Walking distance. Love the school.
169	NA
170	Would like to have French immersion in Hatzic
171	Even though our catchment school isn't as close as I would like, I love our school. We have the best teachers and our kids are happy.
172	Over population of the school need to build portables. Children should not be denied access to their local school.
173	middle school distance for a grade 7 student is ridiculous .Either scrap middle schools and reconfigure for elementary /secondary only or provide additional middle school facilities to cut down on student travel time.
174	French immersion boundaries are working.
175	Our catchment school is not easily accessible.
176	School bus access denied to us as we are in French immersion program
177	I disagree that the school attended for elementary is what determines your middle school. It should be based on location.
178	Distance to middle school
179	Not caring for the school in my district
180	Busses not being available for students
181	The fact that we live within a 5 minute walk to hillside traditional and my son has to attend a school that would be atleast a 20 (or more) minute walk away, that is what is not working.
182	proximity to both schools of choice
183	N/A
184	Mission SD has prepared my children for adult life, with the last one completing the program of choice. The other two are studying and working in meaningful roles. This is the most important part of the good things that have happened in our schools of choice and for our catchment.

## Boundary Catchment Review SD 75 (Mission)

**What is currently working or not working for your catchment?**

185	There should be a bus service to Christine Morrison from silverdale
186	We were not satisfied with the elementary school in our catchment so we switched to a cross boundary school more suitable to fit the needs of our children.
187	To me everything is working
188	Busing should be available to all students desiring to attend a choice program, regardless of economics. Limiting choice programs (through available transportation) to families who can't afford to take time off work to drive children to school is not equitable, and reinforces systemic income inequality while giving the appearance of fairness (a "choice" school is not available as an option when you can't "choose" it because of your economic position).
189	Parking
190	I prefer christine Morrison. It's a bit better than mission central.
191	It's close, it works for us
192	Crossing Highway 14 (14th ave) as a walking route. There's far to much excessive speeding on this road.
193	A concern I have is for safety of the children. I feel parking is an issue for many schools and I am happy that Hatzic has a crossing guard always available but there is never one at Albert McMahon and I have seen many near misses there when children dart across the road without supervision.
194	I want my children to attend the art based school and have no problem driving them to get that education that benefits them
195	Hatzic Elementary is in need of major upgrades to the building and school grounds
196	I have little to no input into our catchment as we have been in french immersion for 10 years
197	No problems with catchment
198	All is good except the odd substitute teacher
199	N/a
200	Too far to walk
201	I like that I can walk my kids to school. I like that they attend the same school as other kids in the neighbourhood. I would like a crossing guard to be at corner of Eider and McRae - it would make it a lot safer.
202	Strong local community development. Nice class sizes.
203	Too many students, large class size
204	Stidents in catchment sometimes are on a waitlist. Students wanting ICF cannot attend due to lack of school bussing.
205	Our catchment did not have space when we moved
206	N/A
207	There are a lot of children in each class. I find teachers are very outnumbered.
208	I prefer to attend a choice school as it closer to my home than my catchment school and I prefer the fine arts curriculum. When it is time for middle school our catchment middle is further away than the closest to our house (ie Heritage Park is closer to us)
209	Catchment is small and based on population from >10 years ago, while Steelhead kids are being sent to overcrowded Albert McMahon.
210	Not working: lack of parking
211	My children attend a school with a program of choice now. I am more concerned about distance to the middle school/high school in the future.
212	Love our catchment school
213	We don't go to our catchment school so we aren't affected
214	Distance

## Boundary Catchment Review SD 75 (Mission)

## What is currently working or not working for your catchment?

215	Bus service for my child is working
216	Oldest child is in heritage middle school . we live █ house from bus drop off. Yet he is not allowed to take it. Takes over an hour to walk at a fast pace.
217	No outdoor program originally and if there were one now I wouldn't want to switch my child schools as they are comfortable where they are
218	ESR is a 10 min walk but our catchment is at the bottom of stage at Windebank. Makes no sense. Our middle school catchment is at Hatzic because he goes to ESR so instead of walking to Heritage Middle he has to take a school bus. Makes no sense.
219	We live right between Hillside and ESR, so if we didn't get into one of these it would have been extremely difficult for getting our son to and from school and also we live so far from Windebank it would not feel like a "neighbourhood" school at all.
220	Limited space for school drop off zones
221	Idk
222	There is a lot of growth in some areas and something will need to be changed to accommodate all the new growth. Lots of these kids will need to be driven to schools instead of walking. The number of parents that rudely drive around the school is a problem but as distances get further and further more people will drive.
223	The daycare my children attend didnt pick up at my catchment school.
224	N/A
225	We attend school of choice right now. However middle school catchment is very far...Hatzic and if I am not mistaken school bus pickup is a long walk from west heights.
226	No busing
227	If I had not wanted school of choice my son would have to have attended a school outside our neighborhood
228	My address is in very close proximity to both esr and Albert McMahon- yet my catchment is cherry hill- this makes NO sense. My children can safely walk to both esr (where they attend) and Albert McMahon. They would have to cross 2 VERY busy intersections to attend cherry hill. The catchments have been poorly arranged
229	My children could walk to their catchment school
230	all good, boundaries are accomodating
231	N.a
232	N/a
233	Our school is too full
234	We live close to the french school, so we're lucky!
235	I feel that West Heights has good class sizes.
236	Getting my kids to stay in the same school as our first son started in CME and they changed the boundaries a couple years ago and we had to fight to put our other two kids in the same school
237	My kid is not in catchment school cause daycare did not drop off at cherry hill. But if she was, because of where we live I would think she should belong to west heights and not cherry hill.
238	we have two schools that we could essentially throw a rock to - cherry hill and albert McMahon. both within walking distance. our back yard is almost griner park but our catchment is christine Morrison and hatzic middle. it makes 0 sense.
239	I am lucky to live next door to my catchment school
240	Close proximity to our house, school of choice

## Boundary Catchment Review SD 75 (Mission)

**What is currently working or not working for your catchment?**

241	Was disappointed when registering my son that his catchment French immersion school (Mission Crntra), was much farther than the French immersion school close to us (Christine Morrison). Due to the fact that we walk, we had no choice but to not put them in French. Very dissapointing
242	We have developed a relationship with the staff at Cherry Hill, as one of our children has special needs, we feel that if the current situation is working well, we would love to be able to continue for the rest of their elementary years.
243	Nothing yet
244	Catchment school Club Kids program doesn't have space for our child, nor does the school he attends. Both schools are over crowded.
245	imbalance between the 2 french immersion schools
246	The catchment school is too full. We chose a outdoor program with smaller class sizes out of catchment to best support our child.
247	it's working fine
248	It works
249	It is hard to say, my children attend a school of choice which is also quite close to my home. I'm glad they have the opportunity to attend a school of choice.
250	We're very far away from our catchment school, but walking distance to other catchment schools. Seems like the school should be in the middle of the catchment area.
251	We live on Egglestone yet our catchment is central (for French immersion) Christine Morrison is much closer, I don't understand why we are being sent to central.
252	Our catchment school is the same amount of time to drive to as the time it takes us to get to school of choice ESR. I wish the bus routes were broader. Also for middle school, our catchment is Hatzic. It is in the far opposite side of town from our home, making the commute much further
253	There is a shortage of French speaking teachers in the French immersion program at the middle school level. After the previous teacher [REDACTED] my daughter had no classes in French for the first half month of the school year, and still has barely any French education.
254	Not enough choices of secondary schools
255	Schools of choice are a joke - families are grandfathered in at ESR and Hillside basically asks how you see yourself volunteering - for those of us already overly busy with our employment this is not always possible. So my child may miss out on a school of choice if I am already busy?! UNFAIR and quasi private school mentality for a PUBLICLY FUNDED SCHOOL
256	No problems
257	Working fine!
258	School parking There is none
259	Bus route
260	No designated sidewalk to walk to the school. (Along cherry).
261	I work and service only certain schools and my child's school is not one of them
262	Na
263	We moved halfway through kindergarten and didn't want to pull our child out of his school. He is now in grade 3 and definitely won't be pulling him out now. So we do cross boundary.
264	It's seemed to be working fine
265	No bus running to Ecole Christine Morrison/Ecole Heritage Park for French Immersion students
266	Our elementary is operating at full capacity and more development is coming into our catchment.

## Boundary Catchment Review SD 75 (Mission)

## What is currently working or not working for your catchment?

267	Not working: overcrowded cause of all the new development happening around it and ESR/Hillside basically not being an option to anyone in catchment. Catchment area goes too far up Dewdney Trunk.
268	Lack of aid to those in need of extra support
269	.
270	Stave falls is a very secluded area and quite separate despite being part of mission. Many of us shop, work or attend school in Maple ridge due to proximity. It is wonderful to have Stave falls elementary open once again but the lack of grade 7 makes it a very difficult option for many of us. I do not want my children spending hours on a bus in their teenage years to attend high school so far away from us.
271	It would be nice to have bus service to mission central from our house on nottman street.
272	Our catchment school has almost no playground.
273	It's close to home
274	See above. Also I don't like the location of my Catchment school.
275	Its fine
276	We are not in catchment because of Over capacity school with less focus on individual needs
277	It's fine , easy drive over
278	No parking
279	BUILD A NEW SCHOOL! with the amount of new subdivisions and town homes, perhaps an upgrade on the current schools could be a necessity?
280	Access to local residents in the catchment area for parking at/near school due to influx of out of catchment attendees and their parking needs.  No sidewalks on highway for kids who walk. No crosswalk out front of school.
281	Nothing
282	Over crowded
283	It is farther for my daughter to attend and none of her family attends that school
284	It's close by
285	All my kids go to windebank. Where they started. I hate having to re enroll them or do cross boundary forms every year. Kids already enrolled from previous years should have first choice. And not be put on waiting lists
286	There are 3 schools closer to us
287	No school buses for French immersion students. Biggest disappointment with Sd#75. I live on Richards Ave.
288	kids walking to school and having to cross a BUSY MAIN ROAD, cedar
289	I'm glad to have a choice school that I cold choose to not have to put my children in the catchment school.
290	We live close to school and the kids walk - however, there are no sidewalks for kids to walk on - kids must walk around parked vehicles INTO THE ROADWAY on their way to school. Totally unsafe
291	I have no opinion
292	My catchment school is literally across town from where we live and I will pass other schools on way to it. Made my choice to use private school easier.
293	Very busy road to walk to school. But it very close by. Would like to go to a smaller school
294	Unable to safely walk home from school. Walking 40 minutes up Cedar is not safe or healthy. If ESR was going to be a school of choice, I wish they had left it as French Immersion.
295	I personally like our catchment school it's located close to our home.

## Boundary Catchment Review SD 75 (Mission)

## What is currently working or not working for your catchment?

296	Lots of homes within walking distance
297	French options
298	In a perfect world we would have school bus service to French Immersion.
299	No problems, but wanted to be able to continue at her original school of choice where she had settled in with routine and friends. Wanted to stay at Morrison until grade 6
300	Walking distance to Heritage Park Middle from Hurd is extremely dangerous. My child has had multiple encounters with cars nearly missing him. Bussing needs to be looked at in terms of student bus cards for transit paid by the school district since the school bus is unavailable for students on the end of 7th
301	Our Elementary catchment is fine - although the school could easily accept more students
302	Elementary is fine but middle school catchment is questionable
303	I have to drive my child to school but live within walking distance to a choice school
304	Working small class size the teachers spend more time and personal know each child not working seems like way to many special needs kids taking up time of teachers and students with outburst etc
305	Don't know. We got into ESR just as the catchment changed with my first kid so his siblings have been getting into our old catchment school.
306	Lack of before and after school care options. Lack of school bus service to choice schools.
307	The only reason my catchment works is my daughter is special needs and is able to take a bus to school
308	No buses go to heritage from deroche or silverdale
309	It was a teacher choice for my Daughter. [REDACTED] was at Central for strong start, then [REDACTED] had to move to Windebank...so she wanted to follow her
310	Everything is fine for my family.
311	I do not care about portables or overcrowding... I care about keeping families together in the schools that they attend. This district needs a sibling real. It is unacceptable that I have to apply for my other two sons to attend the school that my oldest son attends. He has Special needs & cannot move schools!!
312	No issues as my children are cross boundaries
313	We are closer to other elementary schools but our catchment is central. If our catchment was a closer elementary school to us, I would not have put my son in ESR.
314	Lack of transportation options
315	We've been told that we were too late registering our Daughter for Kindergarten. It's Frustrating because this is supposed to be our catchment school we're within an eight minute walk and really prefer not to travel to another school. Nowhere on the Heights elementary website did it state that we would need to come in Monday morning on a first come first serve basis it states on the website you can register Monday to Friday. We came in on a Wednesday to register
316	The elementary school is great, however the middle school for our catchment is much too far away. Hatzic middle school is very inconvenient for many families to get to via anything other than driving.
317	Attend out of catchment. I am hoping my kids can remain at Dewdney as their catchment school is Albert McMahon and I would rather my ids go to with a lot less students
318	Too young for school
319	Only high school
320	We enjoy ECM and have absolutely no desire to move.
321	My catchment school isnt even a top 3 candidate for my daughter so if we arent able to get into Hillside Traditional we will be stuck with a school I am not fond of

## Boundary Catchment Review SD 75 (Mission)

## What is currently working or not working for your catchment?

322	catchment lowkey be booty like i gotta do some serious walks to get to a place with smelly walls, ugly halls, and people that don't know how to read i ant feelin the vibes there rn.
323	I feel my catchment school is run down and not taken care of. I think if anything needs to be looked at it's the play structures of all the schools and the maintenance on all the schools. Most are falling apart. The school I choose to put my daughter in is needing repairs as well but she at least has a group of friends she's grown with since kindergarten.
324	Wish they had a better lunch program
325	Our school is at max capacity with a number of new houses still being built and or sold. Many of these homes (while initially were supposed to be single family houses) are including suites etc. creating a great deal of pressure on the current elementary school.
326	Overall, I feel like the catchment works fairly fine for West Heights. In my neighbourhood it is divided into 3 elementary schools- West Heights, Christine Morrison and Cherry Hill. I find this does fragment our relatively small neighbourhood.
327	Walking distance to school
328	Our catchment school has limited spaces but I'm very happy with weat heights elementary [REDACTED]
329	first year of school and experiencing no issues as yet.
330	We are considering enrolling our second child in French Immersion. We are closer to Christine Morrison than Central, but Central is our catchment school for FI. I think the boundaries for the two French Immersion schools need to be reconsidered because EMC's is catchment is huge compared to ECME. This is creating over/under capacity scenarios for these schools when enrolling Kindergarten students.
331	3 min walk to school
332	No other school close by for a choice of catchment. Hatzic is a largely populated area with people coming from out past Dewdney, with no other choice of school.
333	The access to and from is on main roads which I like
334	Not enough TTOC's. Lack of EA's for student who require it.
335	A choice school is right across the street from our home but can not get my son enrolled even though he is on the wait list
336	Short travel distance, kids use the bus
337	We don't go to our catchment school as it was A:full, B:didn't have childcare available C: was further from our house then stave falls. Would be nice to have to option of a free school bus to stave falls
338	Bus transportation... ie : they drop off at my house but will not pick up in the morning I have to drive with two babies 500 m ( as my child is too young to walk alone... yet alone on the HIGHWAY), they pass our house anyways after he is picked up by the bus.
339	Outdoor program is great
340	Students living close to catchment borders, should have the option to attend one of the two schools they border. As it sits now, (K & K-1 ) children are no longer in walking distance of their school, and have to be driven to the school in their catchment
341	We need to get more help for students for reading, writing and math
342	We are within quick walking distance of our school, so I have no complaints at this time.
343	School of choice is outside the catchment
344	My daughter has attended Christine Morrison in the French program since Kindergarten. She would like to continue in the same middle school as her friends but with the current configuration, she would have to change schools if she left the French program.
345	I think another high school option is needed I don't want my daughter going all the way into mission to attend school we live out of town for a reason
346	Our catchment school has be overcrowded for YEARS so clearly that isn't working.

## Boundary Catchment Review SD 75 (Mission)

**What is currently working or not working for your catchment?**

347	Christine Morrison is closer to our house yet our catchment is mission central
348	everything is working.
349	I m close to my school the program is good
350	Only because I live in the catchment to my kids schools (hatzic elem/middle) it is fine.
351	Its good
352	My only issues are the lack of safe sidewalks and lighting along Cherry ave, which many kids use to attend our catchment school (Cherry Hill) and Albert McMahon.
353	Things are fine More caring teachers who are not just there for their pay check would help all students
354	Too many students need to be driven and there is no parking available. Not everyone drives safely and it's a concern for us as we walk
355	Too many students entering our school because of behavior problems at their catchment school in the district. It's not addressing the issue and needs of the student but just moving students around. We need more support or alternate education for elementary students who are not responding to the typical public school. Putting these students into the outdoor school is not the solution either. There needs to be trained personnel and different programming working on mental health.
356	Na
357	It's within walking distance
358	Overcrowding
359	Having the French Immersion catchments split East / West seems to work well
360	middle school catchment is terrible. currently when my son graduates to middle school he will be in the Hatzic catchment, even though Heritage is much closer.  Elementary school catchment is fine.  work on middle school catchment.
361	No concerns -
362	The limited number of spots for siblings coming into the school is a concern. The school is literally behind our house and I am concerned that siblings are not being given priority in catchment schools, leading to the possibility of a sibling being turned away. As someone with two children in our catchment school, I do have concerns about the ability to secure a spot for my third child. When my second was registered, priority for siblings was a thing and our registration opened first.
363	I just choose to have my kids in Hatzic love the neighborhood plan on moving there in the future
364	My son is well adjusted and loves his school. It would cause a lot of stress if he had to leave his friends and wonderful teachers. He has Alopecia Areata (no hair) and everyone is used to him as well as him to them.
365	Change in the French immersion boundary changed who was in the program as to friend groups and created a change in the staff
366	Catchments seem to make sense in our area, some other moms I've spoken too don't understand their boundaries as other schools are closer then their school
367	What's currently working is that if there is a sibling in the school, those children can stay. If there's a new incoming Family into kindergarten, that's the time to re-direct their family into a school that is not overloaded / a new catchment for them.
368	We are very happy with our catchment, school bus access is good and Hatzic Elementary is great.
369	My child went to Christine Morrison for French. We live on Mcrae, but I don't want my child crossing Hurd when her school is up the road

## Boundary Catchment Review SD 75 (Mission)

## What is currently working or not working for your catchment?

370	I'm not sure.
371	Our catchment school for middle school is very close to our school that will be to. The school bus picks up the choice students on our street and will take them to the middle school but because my child is cross boundary he is not allowed on the bus. I think it's not a good process. My children have gone to the same school throughout the 9 years in MPSD regardless of where we lived
372	The same opportunities are NOT being given to students that are not in a program of choice at our current school ( FRIM vs ENGLISH) But our catchment school is a FRIM/English school. We would have to x-boundary out to attend an all ENGLISH school.
373	Lack of school buses for French immersion students
374	Our catchment is great because we are within walking distance to Christine Morrison however the segregation between the French and the English kids causes a lot of bullying between peers. Either Mission Central or Christine Morrison loses the French immersion program and a new French immersion program pops up in Hatzic or Dewdney. Somewhere further apart where mission can be split right down the middle. Also I understand the need to be strict with the cross boundary applications, however when a mother is pleading the school district to allow her children to go across town to a different school because her child was receiving death threats that should be brought into consideration as to excepting a cross boundary. We have been forced to stay at Christine Morrison because our applications kept getting denied because your two choice schools; ESR and hillside are so close together; all the kids filter down to windebank. I really believe those schools need to be further apart.
375	Whats the hardest challenge Is transportation of my Autistic child to and from choice school. (While I am away from work)
376	It's fine as is
377	As for middle school catchment, I disagree with Hatzic being our catchment school. It should be heritage. Doesn't make sense to me and I want my kids at heritage for middle school
378	school is not within reasonable biking distance and definitely not walking distance
379	Hatzic is a developing area. Many new homes were recently build and more are still being built. This means more families... more kids... but the school is running out of or has already run out of room.
380	I really like Hatzic Elementary and area. I like that it is the catchment for my children.
381	We don't go to the catchment school. If we did , it would still be too far to walk... Without busing we decided to go to hillside instead.
382	No busing available for French Immersion students attending heritage park !!
383	Works great
384	im not sure as we don't go to our catchment school. I heard its very full and even if we wanted him to go there, there would be a wait and maybe he wouldn't even get in
385	We are at our catchment school and because of all the cross boundary families the traffic is atrocious. More kids just going to their catchment school would actually make school zones safer by having children walking to school rather than having to be driven.
386	Too many portables, very crowded school building
387	Parking drop off/pick up congestion needs improved
388	Not aware of any issues
389	Easy access to French immersion is working. But regular school catchment puts our regular school as one of the farthest out of 4 and more out of the way for us.
390	No negatives. It's working because it's the school we want our kids to attend
391	We would like to have all siblings be able to go to same school

## Boundary Catchment Review SD 75 (Mission)

## What is currently working or not working for your catchment?

392	Not applicable - no kids in catchment
393	We need another high school
394	Being close to our home
395	Close to home
396	Currently working for us. We choose to put our children in French immersion and nether school is particularly close to us. Would like it if there could be a bus to take the kids to middle school. Since our "catchment" school is Hatzic there is no bus service for our kids who will be attending Heritage
397	The walking distance
398	We love our school
399	We live in Harrison Mills and it's significantly closer and safer to drive to Deroche elementary than go over the Agassiz mountain and drive longer to get to Agassiz ... especially during the winter
400	We're thrilled our catchment school has a French Immersion program.
401	Have no idea
402	Parking lot is an issue, a bit of a far walk for us, despite being in catchment.
403	Yhe wait list
404	Lack of resources at school
405	Whats working is the elementary catchment is close, but middle school catchments are ridiculous. Living by Cherry Hill shouldn't mean my kids be sent to the opposite side of town to Hatzic, especially when my kids will be going to two different schools as they age.
406	For having such a large bilingual population in Mission, the fact that French Immersion schools are so few and far between can be frustrating to some families
407	The fact that they only kept Silverdale open which is old and moldy unsafe out of catchment Vs closed a newer building Stave Falls elementary within catchment. Then attempted to sell it?! So it is working that they reopened Stave Falls but it only goes to grade 6 as Mission District is a middle school model. Maple Ridge is not. So my kids are already enrolled in the closest option that was available ( Whonnock) made no sense to pull them to Stave until grade 6. Then back to grade 7 in Maple Ridge. I do not have trust or positive reputation of any of the middle schools or high schools in Mission. They have an "inner city" reputation & culture. Closing Stave Falls was a short sighted unfortunate decision that left families with no other option then to take their kids out of Mission school district.
408	My catchment seems fine
409	NA
410	We like being able to walk to school and that the kids are all so close to each other for building relationships. Also for helping all the families out as needed.
411	N/a
412	Only one high school. Can't get classes needed
413	Our catchment school is very full but it is walking distance for us and my kids are settled so I would be hesitant to change that as not other school is walking distance. There are some cross boundary kids that are in the school so those should be moved back to catchment prior to changing boundaries as that would create space.
414	Huge development is happening in Hatzic and the elementary school is small. I have heard of catchment students not getting in and being bused elsewhere. It has also been said this year has record high registration happening for kindergarten students
415	We don't attend the catchment school. We originally lived in mission and applied early for Traditional school as it is in line with our views on how learning environments should be. Since it's a school of choice, when we moved to Deroche we opted to keep him there.

## Boundary Catchment Review SD 75 (Mission)

## What is currently working or not working for your catchment?

416	Na
417	ChildcAre
418	I pass 2 choice school to get to our current school.
419	We are located close to our school but the parking lot is a nightmare. My child is special needs there is not enough handy capped parking spaces and the parking lot is dangerous as it is now
420	It works for me... I'm a 10 minute walk
421	Overcrowding
422	I prefer to keep my kids in the school they started in so they keep the friendships they've developed over the past few years. None of my kids friends are in our catchment school, and being the new kid in older grades is not fun.
423	I believe that students should attend their catchment school. What I believe is not working is that there are a significant number of students who are out-of-catchment taking spots away from students in the catchment.
424	Too far for my child to walk so I have to drive
425	No outdoor learning programs within close proximity
426	Large hills for young students to walk so driving and parking are constant issues
427	So far so good
428	AME is over crowded
429	Over crowded
430	I don't have enough information to answer this question.
431	No comment
432	School is within walking and biking distance if needed.
433	When its time for middle school it will take almost an hour to walk to heritage park
434	Within walking distance. School doesn't seem too overcrowded
435	N/A
436	We have such a huge influx of kids that my daughter has to wait till next year to get into English and she far behind in French and English. On the other hand the vice principal and her teacher are very supportive and trying to help her the best they can right now.
437	Walking distance, access to school
438	Need better teachers who work harder and are more involved with the students regarding reading/writing.
439	We chose french immersion years ago, cherry hill is probably a great school and walking distance.
440	I don't have any issues with the catchment we are in and the school my children attend.
441	High school students from the dewdney and deroche area have a very long bus ride cause everyone gets picked up together
442	There isn't enough parking, and not enough is done in the winter to protect kids walking to school. The roads are covered in snow on main walking routes forcing them to walk on the road
443	The only thing that is currently not working is the lack of crossing guards for ECM. There isn't one at McRae and Eider And theres been so many near misses of children and adults getting hit. We need another crossing guard
444	I love the proximity of my daughter's elementary, but the middle school is a 15 min drive with only a 10 minute difference between first bell at elementary and first bell at middle
445	Location, walking distance to school
446	Arbitrary Cross Boundary requests don't lead to equitable enrollment. It creates a wide gulf in "have" vs "have not" schools.

## Boundary Catchment Review SD 75 (Mission)

**What is currently working or not working for your catchment?**

447	I love the Arts program at ESR but I primarily chose to because of its proximity to our home. I am frustrated that the location of ESR changes our catchment to Albert McMahan when it would take my family more than an hour walking to drop off or pick up from school.
448	Walking distance to the school
449	Dont attend catchment school
450	Our school has stayed small.
451	We lived half a block away from esr when we moved to mission. We were told our 5 year old was expected to go to windebank which meant a 30-45 min walk through residential areas to avoid the 20+ min walk down an un safe stave lake road. Our entire family went to ESR so it's truly sad that our children are going to Albert McMahan now
452	Walking route
453	Deroche elem does not offer outdoor school, not happy with how small and inefficient this school is.
454	Hasnt been an issue for us
455	Ability to bus to choice school
456	I live across the street and down a few blocks. It's easy to get to.
457	My children don't go to their catchment school. They attend a French program
458	We are very happy with our catchment school!
459	The Program at Christine Morrison is wonderful and convenient in location for us. The school is a short 5 minute drive in the morning.
460	Love my school and we are in the catchment. Very thankful for the BUS everyday!
461	I don't think steelhead's catchment should be Albert. It's a closer/more convenient drive to go to stave falls
462	great prinipal at our school makes it so much better
463	I like our catchment as is. I do not wish to move my kids to another school.
464	Both schools of choice are on the same end of town within minutes of each other. They have a large bearing on kids having to leave their catchment and go to either of the next closest schools being windebank or Albert McMahan. Not to mention the amount of traffic as more and more kids are not going to schools not close to their homes.
465	We live MUCH closer to the other French Immersion school. I understand the boundaries and we do love our school it's just odd to live a full 3 mins closer to once school and it's not the one you go to.
466	No complaints...
467	Made Hatzic Middle back to the way it was, grade 7-12. Kids thrived when they had their teachers for long periods of time and did better in school socially and academically. We also had the best high school band and opportunities and the high school program does not have a skilled enough teacher.
468	It is not our school of choice nor does it support the outdoor learning program.
469	N/a
470	Beside the sub par education that the children are receiving through their teachers causing children to hate their schools.... alot
471	Walking distance is an issue
472	Steelhead student should be attending Stave Falls Elementary
473	I'm happy with our catchment
474	I love the school my boys go to, we have access to a bus right outside our park, no complaints
475	Don't know..perhaps based on the amount of new French (x2 K classes) theré should be either more schools with French immersion or an entire school dedicated just for that.

## Boundary Catchment Review SD 75 (Mission)

**What is currently working or not working for your catchment?**

476	I like that my son can catch a bus
477	Unsure
478	Need a bigger catchment as we are rural, need to not charge for busing
479	nothing
480	It's working
481	N/a
482	<p>We love windebank and the people there. My child has special needs and they are wonderful to work with.</p> <p>Parking and school drop off/pickup suck as too many people have to drive their kids to school and the school population has ballooned.</p> <p>The isp room and large sensory room had to be converted to classrooms. The crr and family place had to be converted to classrooms. The music room was turned into a combo isp/sensory room due to lack of other space. Smaller would be better both hillside and esr are more walkable, but with a special needs child I would not want to change schools now.</p>
483	I live beside hillside. I purchased my home before it changed to a traditional school. I find it ridiculous that you can live next door and can't attend then have to drive your kid to school. The decision to make it a choice school was ridiculous and there would be other locations that could have been better suited. The fact that I paid a high price for a house and now have to drive me kid to another school is ridiculous
484	Because of rebounding I ended up with kids in different schools. The over crowding was foreseeable and should have been address a long time ago
485	Working, neighborhood is somewhat separate from rest of town and most kids here go to Hatzic
486	Working
487	Well I'm closer in distance to two choice schools and cherry hill yet I have to go uphill and further to get to catchment. I'd love to be able to walk
488	Busy streets and speeding along Stave
489	No comment as my children don't attend their catchment school
490	I wish the elementary school wasn't such a distance from our home.
491	N/A
492	I don't know as my children have always been at ESR and have never gone to their catchment school
493	it seems like we have a good mix of walkable close students and those that drive
494	We live on Grassick st and there's no side walk going down Stave Lake st so my daughters will never be allowed to walk. One daughter is at Heritage park middle school and one at Windebank
495	Windebank is very full. I think the school has a lot going for it but a lot of kids travel for school
496	We live close to the school
497	We personally have no issues at the moment.
498	Being able to attend French immersion in Central works for us from deroche
499	<p>My catchment school is a 30 min walk from our home. The school my children attend is an 8 minute walk.</p> <p>My youngest is only grade 1 and cannot walk to school 30 minutes away on his own. I'm also disabled and cannot walk more then 10 minutes, especially up and down the very large Hill that we would have to walk down to get to the "catchment school"</p>

## Boundary Catchment Review SD 75 (Mission)

**What is currently working or not working for your catchment?**

500	I wanted my children to attend Christine Morrison/ French. I don't want my children at Central. As far as dewdney goes, I think the problem I see is too many children with behavioural issues are transferring there after their catchment school doesn't work out. This seems to be leading to a concentration of behavioural issues and a gender imbalance.
501	What's working is that we have a group of help and teachers who know from the past few years my child's needs
502	Over population!!!
503	Everything is working
504	My child going to Hatzic Middle is able to walk. My child going to Ecole Mission Secondary is able to catch the school bus. We are happy in this regard.
505	It's working
506	The boundaries are out of date. Kids who live on the same street, 6 house apart go to different schools.
507	Bus services work great at no cost The outdoor program is great
508	The school is already overcrowded and the neighbourhood near the school is growing. The catchment area needs to be smaller
509	We are cross boundary in the French program. I would love to not have to apply every year for my three children to continue to go to their school. Once we are in the school, I would like to not have to worry each year about placement.
510	not working: busing for stave falls. I drive my daughter both ways every day. Working: easy enrollment, small class size, outdoor education
511	I like that I can choose where I want my kids to go to school. I have the chive and it isn't dictated to me!!
512	My child was not able to continue with French and our catchment school was full and also did not have an ISP program to meet their needs.
513	Location is ESR is a lot closer than School we had to attend
514	Families that I'm aware of that come out of catchment to our school need the option of bussing. Our school is considered a neighbour hood school with a catchment but has a CORE program that appeals to families out of catchment. It would be nice to make it easier for them to get to our school
515	It would be nice if hillside had a neighborhood catchment that took priority over the choice waitlist. Otherwise we cannot walk to school down the huge topper hill. Or not now while we have stroller and little kids it would be very very challenging
516	Too small
517	Having it changed. We purchased our home with the school boundary in place. We were not expecting it to change. We may go out of district if there are changes to our middle school catchment
518	North side of the street is one school and the south side is another. Neighbourhood kids don't get to go to the same school
519	School allows alot of out of catchment students.
520	No school buses that will go from in town, to dewdney
521	Central has a bad reputation for being an "inner city" school with drug issues
522	Christine Morrison seems to be doing fine. I like the French catchments too.
523	My son is planning to do the hockey academy in middle school, so being that ESR students will migrate to hatzic works well for our long term plans
524	Hatzic middle way too far from Steelhead. Cedar Valley needs a middle school. 20 min drive each way is excessive. Kid is gone from 7:30-4pm. long day for a 13 yr old.
525	Our catchment school is not walking distance
526	Hatzic middle school from silver dale is a long way out !

## Boundary Catchment Review SD 75 (Mission)

## What is currently working or not working for your catchment?

527	Neutral
528	The lack of secondary school options within the district. The entire district funnels to one secondary school and this is unrealistic:
529	Funding to school, bad reputation, programs offered
530	Get more families walking. It's ridiculous the number of cars that arrive to pick up kids. Less cars make it safer for kids. Also make it clear to everyone that they leave their dogs at home. There are some huge dogs coming on school property.
531	Too many students - increased new development Children and parents able to walk/ride bikes to school Children able to attend neighbourhood school
532	It's too far from where we live. We live in Hillside's old catchment
533	The catchment boundaries exist, but there always appear to be anecdotal exceptions being made. If there are catchments, stick to them.
534	Over populated
535	N/a
536	n/a
537	MSS is too small for all the students that it has. It would be better if Heritage Middle school could be a senior secondary school as well. Which would eliminate the confrontations between Hatzic students and Heritage Park students and portables would not be as necessary. I think that putting 2 middle schools into 1 senior secondary school that is far too small is unacceptable.
538	We drive to mission central. It would be great to see a French immersion school closer to the top of mission as many families live there now and have to drive further to school to attend French immersion
539	love our school
540	I think every school has an issue with parking for parents at drop off and pick up.
541	We're unable to get in to our catchment (waitlisted). Since I also teach in the catchment, I would really like the opportunity for my children to go to their community schools
542	Too large a catchment. Stave Falls should be the traditional school
543	Wasn't the school I wanted my kids to attend
544	Hillside is right in the middle and a great location for us
545	I do not agree with the middle school catchment. We are located so close to Heritage Park Middle School yet my kids are expected to go to Hatzic Middle School. I often question why Heritage was not made the High school since it is located in the middle and then the current MSS could have been the middle school for that side of town and Hatzic could have been the middle school for the other side of town. It doesn't make sense to me why MSS was chosen to be the high school.
546	Parking can be a challenge
547	Too far to walk when she was attending. School bus is a joke. They have to stand around and wait at the high school. Can't attend out of school activities because buses drop your kids off way out of area.
548	We have a community of children that play together outside of school as well as at school because they live close to their catchment school.
549	We go out of catchment because our children will attend the school my wife works at. It is very important to us to have the option to cross boundary our kids to our school.
550	I am not sure. Not apart of catchment school
551	Christine Morrison is strongly French Immersion. Does not work for my child.
552	It's fine

## Boundary Catchment Review SD 75 (Mission)

**What is currently working or not working for your catchment?**

553	Middle school students should return to catchment Middle school instead of sending them with their peers. HTA & ESR students should return to their catchment middle school.
554	The parking is not very accommodating
555	Closest elementary school has outdated and unacceptable traditional philosophy. Has no place in modern educational practice.
556	N/A
557	My child is a courtesy rider. Our neighborhood doesn't qualify to bus to heritage park. Way too far to walk. We also have an older son st Mission. He is driven there. As a parent 2 different school drop off zones is extremely stressful!
558	Too many special needs students
559	We are preparing for middle school and Hatzic is to far to travel for our family.
560	It's fine
561	Some access pathways to avoid crossing at a busy road with limited visibility
562	The catchment school is very large and I think this limits transitions into school for kids. We are very nervous/anxious about when the kid's get to middle school as they are run like a high school.
563	School Bus service is great
564	Students having to walk long distances as the two schools of choice are in such close proximity to each other.
565	Our catchment is very walkable and there is not yet a need for portables.
566	We live in the Silverdale Elementary Catchment and I work in the district at [REDACTED]. There was no way I could get my child to school while she was attending elementary school and pick up was too far from our home. We chose the Core French Program intentionally to remain in the school area we wanted. Before school care will be a must at the school for my youngest who is not yet attending school.
567	Working=close to my home Not working=some of the staff seem to have forgotten that the school is an inner-city school
568	School is at capacity, worried that the high school will be over capacity by the time my child will attend.
569	We don't have busing to school of choice
570	Too many students in some classrooms
571	Having one high school is not working
